About Us

HME Civil Engineering Ltd is a specialist civil engineering consultancy business, based in Hebden Bridge, West Yorkshire and serving clients across the North West. We provide professional design, advisory, and project delivery services to domestic, commercial, and public sector clients.

Founded by **Henry Emsley CEng MICE**, a Chartered Civil Engineer with over a decade of experience across the built environment including highways, rail, housing and infrastructure projects, we combine technical expertise with practical on-site knowledge.

Our **consultancy** work spans structural, geotechnical, environmental, highways, drainage, utilities and regulatory support. We also offer project management, contract management, and health and safety support.

Our philosophy is simple: **deliver excellence, safely and sustainably, on every project.**

Qualifications and Accreditations

We are fully insured and committed to maintaining the highest professional standards across all areas of our work. Our team holds a wide range of qualifications and industry-recognised accreditations, ensuring competence, compliance, and best practice on every project.

Professional Memberships & Chartered Status

- Chartered Engineer (CEng), Member of the Institution of Civil Engineers (MICE)
- Member of the Association for Project Management – Practitioner (MAPM)
- Level 5 Diploma in Management and Leadership – Chartered Management Institute (CMI, 2022)

Safety, Health & Environmental Competence

- CHAS Elite (Contractors and Consultants Health and Safety Assessment Scheme) Accredited
- SMSTS (Site Management Safety Training Scheme)
- SEATS (Site Environmental Awareness Training Scheme)
- IOSHH Incident Investigation Awareness
- First Aid at Work Certified

Construction & Site Competence

- CSCS (Construction Skills Certification Scheme) – Managers and Professionals (MAPM)
- Temporary Works Coordinator

Utilities Competence

- OLEC 1 (Overhead Line Electrification Construction in Rail)
- Utilities Coordinator Accreditation
- IOSHH – Avoiding Danger from Underground Services
- Energy and Utility Skills Register – Advanced Engineer

Consultancy Services

We continue to provide a comprehensive consultancy service to developers, architects, contractors, and homeowners. Core services include:

Design

- Drainage design and Infiltration testing
- Highway design including S278 works
- Landscape design

Structural Engineering

- Structural inspections, calculations, and design.
- Temporary works design and coordination.
- Lift planning and crane pad designs.

Geotechnical Engineering

- Ground investigation scoping and supervision.
- Foundation design and slope stability assessments.
- Earthworks specification and compaction strategies.

Environmental Engineering

- Contaminated land assessments and remediation strategies.
- Flood risk assessment and drainage strategy reports.
- Ecology support and consents.
- Biodiversity Net Gain (BNG) assessments and calculations.

Additional Services

- CDM compliance, RAMS, and safety advice.
- Surveying and condition reporting.
- Topographical surveying.
- Risk management and value engineering advice.

Project Management Services

Project Management

End-to-end coordination of design, procurement, and construction phases to ensure delivery on time, within budget, and to specification.

Contract Management

Administration of building contracts, including monitoring contractor performance, valuations, and change control.

Utilities Management

Liaison with statutory undertakers for new service connections, diversions, and disconnections, ensuring timely delivery and compliance.

Programme & Risk Management

development of project programmes, identification of risks, and implementation of mitigation strategies.

Effective communication with clients, contractors, consultants, and local authorities to manage expectations and approvals.

Cost Control & Reporting

monitoring budgets, preparing cost reports, and providing advice on value engineering opportunities.

Health, Safety & Compliance Oversight

ensuring statutory requirements and CDM Regulations are embedded throughout the project lifecycle.
